Dear Ms. Trombetta,

We have some interesting preliminary data with AS2-1 !!!
[Will share with you the results as soon as I determine that they are reproducible].

I will now need to examine the effect of the sodium salts of phenylacetylglutamine (AS2-5 ?) and phenylacetic acid separately. Could you please provide me with these agents ? (about 10 g of each will do); What is the m.w. of each of the chemical compounds ? ; What is the stability of the agents in solution (in H₂O) at 4°C ?

Is there any new data regarding the efficacy of AS2-1 in the clinic ?

Dvorit
